**BÖRGER**<sup>®</sup>  
EXCELLENCE - MADE TO LAST

**BOERGER**  
**BOOTH #4415**

Boerger designs, manufactures, and sells rotary lobe pumps, macerating technology, separation technology, and feeding technology to convey low to high viscous and abrasive media. Key applications can be found in wastewater applications including sludge (primary, WAS, RAS, digested, thickened, etc.), biosolids, grease, sewage, scum, lime slurry, alum sludge, permeate, polymers, etc. Boerger products are designed with maintenance-in-place, which allows for all wetted parts to be easily replaced through the front cover without the removal of pipe or drive systems.

**GORMAN-RUPP**  
**PUMPS**

**GORMAN-RUPP PUMPS**  
**BOOTH #3429**

Gorman-Rupp sets the industry standard for packaged wastewater-handling pumping systems. Our ReliaSource<sup>®</sup> lift stations are 100 percent custom-engineered, manufactured, assembled, and tested by the experts at Gorman-Rupp. That means when you choose ReliaSource, you choose the ultimate in reliability, long-lasting operation, and value. We precision-match the pumps, motors, controls, valves, pipes, and accessories in every ReliaSource system for maximum compatibility and maximum performance—guaranteed.

# KROHNE

▶ **measure the facts**

KROHNE is a world-leading manufacturer and supplier of solutions in industrial process instrumentation and offers supporting products and services for one-stop-shopping and in industries as widespread as oil and gas, water and wastewater, chemical and petrochemical, food and beverage, power, minerals and mining, and marine. With flow, level, temperature, and pressure measurement as well as process analytics, KROHNE offers the whole range of process measurement instruments. [WWW.US.KROHNE.COM](http://WWW.US.KROHNE.COM)

**ALLIED MOULDED PRODUCTS, Inc.**

**ALLIED MOULDED PRODUCTS**  
**BOOTH #3005**

Allied Moulded's extensive line of NEMA type 4X/IP66 fiberglass reinforced polyester (FRP) enclosures, made with our proprietary ULTRAGUARD® resin formulation, outperforms competitors in the areas of: yellowing, gloss retention, discoloration, and change in texture. Allied Moulded also offers our POLYLINE® series, a line of polycarbonate, injection-molded enclosures. With a wide range of sizes, accessories, and customizations available, Allied Moulded can solve your industrial enclosure needs. [WWW.ALLIEDMOULDED.COM](http://WWW.ALLIEDMOULDED.COM)

**BLACOH FLUID CONTROL**  
**BOOTH #3406**

Blacoh offers engineered fluid control products manufactured to exacting standards in a wide variety of sizes, materials, and pressure ratings to suit virtually every application. Blacoh has been improving process system performance, reliability, safety, and productivity for over forty-five years, so find Blacoh products wherever fluid is being pumped. Blacoh products are made in the USA for a reason—nothing gets in the way of providing Blacoh products to customers.

# MELTRIC CORPORATION

**BOOTH #3973**

**A COMPANY OF MARECHAL ELECTRIC**

Reduce downtime. Mitigate litigation. Eliminate risks. Discover the perfect solution for safe, reliable pump and motor connections. MELTRIC® DSN and DS, UL & CSA listed devices offer arc flash protection, are watertight, and are ideal for making and breaking connections under load. Specifically designed for use with pumps, motors, lift stations, blenders, generators, and more. Visit us at Booth #3973 during WEFTEC for hands on demonstrations that show how MELTRIC can improve your operations.

**SMITH & LOVELESS**  
**BOOTH #4029**

**Smith & Loveless Inc.**

Packaged Smith & Loveless EVERLAST™

Above-Ground Pump Stations offer the best choice for pump O&M, safety, longevity, and costs. Everything is above the wet well and inspection of the complete pump station can be accomplished in mere seconds, eliminating all of the confined space hassles and costs associated with pulling sewage-coated submersible pumps from the wet well and accessing confined space valve vaults. Pump clogs are virtually eliminated with the non-clog X-PELLER® wastewater pump impeller due to its unique monoport design that allows it to successfully pass problem flushables and 3-inch solids. QUICKSMART™ Touchscreen Controls offer the most operator-friendly pump experience with remote control and system maintenance reminders.

**HOMA PUMP TECHNOLOGY**  
**BOOTH #6127**

HOMA stands behind every product with a generous warranty, extensive spare parts inventory, regional authorized service centers, factory engineers and technicians who are all dedicated to the support of the entire HOMA product line. Whether your application requires a residential grinder or effluent pump, or you are handling an industrial process stream or municipal wastewater, HOMA will engineer a pumping solution for you. [WWW.HOMAPUMP.COM](http://WWW.HOMAPUMP.COM)

**TSURUMI PUMP**® **TSURUMI PUMP**  
**BOOTH #4341**

Tsurumi Pump is a world-renowned manufacturer of submersible pumps, providing equipment for various applications such as wastewater treatment, mining, construction, water features, sewage bypass, and more. Tsurumi is known for its advanced pump technology, strong distribution network, and one of the largest inventories in North America. At this year's WEFTEC, Tsurumi is showcasing its AVANT® line of wastewater products.

**VAUGHAN COMPANY**  
**BOOTH #3717**

Established in 1960, Vaughan Company is the industry leader in reliable chopper pumps and mechanical hydraulic mixing systems. With more than sixty years of experience, Vaughan Company remains committed to giving their customers outstanding service and the most dependable product solutions in the world. Today, Vaughan chopper pumps are the specified product for tough environments where other conventional pumps have proven to fail. Vaughan Chopper Pumps are available in a variety of sizes and configurations, including vertical wet well, vertical recirculator, submersible, submersible recirculator, self-primer, horizontal, and vertical dry pit. Sizes range from 3- to 16-inch discharge, depending on the configuration. Vaughan promises you the best not only in product design, reliability, dependability, and availability, but also in service and support, to assure you of the lowest in lifecycle costs.
